The most recent International Summit for Packaging Industry (ISPI) was held from 6th - 8th March 2025 organized by Indian Institute of Packaging (IIP), and autonomous Institute under Ministry of Commerce & Industry, Govt. of India, was widely regarded as a success, bringing together a large and diverse group of stakeholders from industry, academia, startups and government. Its highlight events - like the Research Conclave and Packathon - enabled many young entrepreneurs and researchers to showcase breakthrough ideas in sustainable packaging, gaining exposure, mentorship, and awards for their work. The summit's theme of “5S: Safe, Secure, Standardized, Smart and Sustainable” resonated strongly, aligning with growing industry and regulatory focus on environmental responsibility, safety standards, and technology adoption.
